

Nukes and Wars? Or Jobs? Tax Day, April 2010

31.9 cents of every federal tax dollar goes to the military budget, pays for the wars in Iraq and Afghanistan, and funds nuclear weapons research and development.

There is not enough money for veterans' benefits and services, for healthcare, jobs, affordable housing and education, but we have enough nuclear bombs to blow up the planet!

The Obama administration and Congress are about to decide on large increases for the laboratories where nuclear weapons are being "improved" and using U.S. taxpayers' money to do it.

Change doesn't come *from* Washington, it is brought *TO* Washington, as candidate Obama said.

Let's bring the change! **We need a renewed movement for a nuclear free world to hold the Obama administration to its pledge of nuclear abolition and to ensure that it will happen "in our lifetime."**

**MARCH for NUCLEAR DISARMAMENT, PEACE,
JOBS, HEALTHCARE
Sunday, May 2nd, 2:00 pm
Times Square, New York City**

No Nukes, No Wars, Fund Human Needs, Protect the Planet!
